Cyclic Epoxy Ester (DCE 410)

CAS RN 62256-00-2

Typical Properties

Property	Value	Test Method
Water, %	0.1 Max	D-101
Appearance / Odor	Pale yellow liquid / Faint burnt odor	D-104
Acid Value, mg KOH/g	0.1 Max	D-171G
Epoxide, %	97.0 Min	D-171F

DCE 410 is a cyclic epoxy ester that functions as an efficient acid scavenger. In phosphate ester-based hydraulic fluids, DCE 410 reacts with phosphate acids, removing them from the system.

Applications

Epoxides are used to scavenge acid from fuel and lubricant systems and de-icing fluids. They can efficiently bond to free acid in these systems and prolong service life of the fluid. Removal of acid also prevents corrosion of internal parts and connectors.

Advantages

- Non-flammable
- Excellent for aircraft, marine and industrial applications where low FST materials are critical to safety of personnel
- Ideal for use in applications where fluid filtration is impractical, including aircraft and marine

Handling & Storage

Store in a cool, dry place; keep away from heat, sparks or flame. When stored properly DCE 410 has a shelf life of 24 months.

Health Hazards

Read and understand the relevant Safety Data Sheets (SDS) for all products before use. Avoid contact with skin and eyes. In case of contact, follow the procedures outlined in the SDS. Generally, these procedures include immediately flushing the affected skin or eyes with copious amounts of water for at least 15 minutes. In the case of eye contact, get medical attention. Wash contaminated clothing before reuse.

Availability

DCE 410 is available from Dixie Chemical in Pasadena, Texas. Contact your Dixie representative for details.
