(MC818)****CASRN 1255682-07-5****Typical Properties**

Properties	Value	Test Method
Water, %	0.3 Max	D-101
Free Acid, mg KOH/g	20 Max	D-639
Appearance	Clear and Free of Particulate Mater	D-104 (Visual)
Viscosity @ 25 °C, cP	100 Max	D-237A

Overview

MC818 is a reactive diluent used in composite resins or in conjunction with composite processes. MC818 is a mixture of methacrylated fatty acids of eight to eighteen carbon chain lengths. The bio-based content of MC818 is approximately 60%.

Applications

MC818 can be used as a full or partial offset to styrene and other commonly used diluents in composite resins. It has a low viscosity and can improve resin toughening properties. Resins formulated with MC818 are suitable for a variety of applications including RTM, SMC/BMC, cast polymer, and CIPP.

Characteristics

The data contained herein are furnished for information only and are believed to be reliable. This information is provided only as guidance and is not to be considered a warranty or quality specification. Dixie Chemical Company, Inc. makes no warranties (expressed or implied) as to its accuracy and assumes no liability in connection with any use of this product.

TECHNICAL BULLETIN

MC818

Resins formulated with MC818 exhibit:

- Less shrinkage compared to typical monomers
- Reduced post-cure emissions
- Increased renewable content
- Less sensitivity to moisture than other diluents
- Lower odor
- Increased fracture toughness

Handling & Storage

MC818 is a combustible liquid. Keep containers of MC818 tightly closed when not in use and away from sources of ignition. MC818 may slowly hydrolyze if contaminated with water.

Health Hazards

Minimize exposure to MC818 and reference the MSDS for specific information and instructions.

Regulatory Compliance

MC818 is listed on the US TSCA Chemical Substance Inventory. MC818, and products or process streams containing MC818, may not be released to waters of the United States.

Availability

MC818 is available from the Dixie Chemical Pasadena, TX. Contact your Dixie representative for details.
